

# .223/5.56 Head Stamps Good to Convert to 300 Blackout

This is meant to be a guide for sorting GOOD head stams from mixed brass for converting to 300blk. This is because the various thicknesses of brass from different manufacturers will affect reliability of the ammo.

Lake City (LC)	Hornady
Black Hills (BHA)	Federal .223 (FC .223 Only)*
Nosler	Starline
Winchester (WCC/WMA/Win)	Fiocchi (GFL)
Perfecta	Independence (PSD)
Remington (RP)	Aguila

\*This brass must EXPLICITLY say FC .223 this head stamp may include an abbreviation of the year like "19". If the brass just says FC with NO .223 caliber indication then the brass is NOT suitable to convert to 300blk.
